Description

Our mappView in B&R Automation Studio training will provide you with comprehensive knowledge and practical skills to effectively use mappView for user interface development. During the course, you will learn how to create interactive and user-friendly visualizations using the powerful features of mappView. Through hands-on exercises and real-world examples, you will be able to apply your knowledge directly to your own projects. The training covers topics such as creating and configuring screens, implementing dynamic elements, integrating data sources, and optimizing usability. You will also learn advanced features such as handling alarms, visualizing trends, and supporting multiple languages. By the end of the training, you will be able to use mappView in B&R Automation Studio to create engaging and efficient user interfaces that meet the needs of your automation applications.
